

2015 Fall Products Guide

Rangeland 30-13 Tub

Rangeland 30-13 Tub is a free choice supplement designed for beef cattle on forage diets providing less than 8% protein. The low moisture, cooked molasses products in non-returnable plastic containers will enhance intake and utilization of available forages, while reducing labor for producers.

Wind & Rain AS 4 Mineral Tub

Wind & Rain AS 4 Mineral Tub is designed for cow/calf and seedstock operators that need a free-choice mineral supplement to assure that their cattle are getting the proper levels and ratios of all of the 14 essential minerals cattle need for health, growth and reproduction. Wind and Rain® Mineral Tubes provide these benefits in cooked molasses formulas and packaged in a non-returnable plastic tub giving the ultimate in weather resistance, palatability and consistent consumption, all in its own mineral feeder.

Rangeland Stress Tub

Purina® Stress Tub is a highly palatable molasses based supplement that entices cattle to taste. It provides the key nutrients needed for a fully functioning immune system so that cattle are fully prepared to face, and/or recover from the stresses of weaning and transportation, respond to vaccination programs, start more quickly on feed or return to their home pen more quickly. It also provides key nutrients involved in reproductive performance to positively impact fertility, estrus, as well as semen quality and quantity. Calves will receive 7 grams of Availa® 4 and ½ ounce of Diamond V® XPC™ per ½ pound of product consumed.

Dairyland Dry Cow Tub

A convenient delivery system to help maintain acceptable dry cow condition needed for upcoming lactation demands Supplement protein, energy, mineral and vitamin deficiencies in forage. Provides needed supplemental protein. Improved health and reproductive performance. Controlled consistent consumption Convenient - labor saving Eliminates biosecurity risk.

Heifer Smart Protein Tub

The Heifer Smart Protein Tub provides high levels of crude protein, intended to enhance high forage diets of heifers being raised on grass to help meet the protein needs of developing heifers.

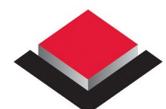

Ignite Calf Transition Tub

The smaller sized Ignite Calf Transition Tub offers Sugars from molasses-based tubs enhance forage digestion, stimulate rumen bacterial growth, and aid development of the rumen wall. Contains Celmanax® to aid rumen fermentation and gut efficiency Contains ZinPro Availa-4® to enhance feed efficiency, hoof, and reproductive development Tub consistency allows calves to lick easily but not over consume. Stressed calves will consume higher amounts of tub; in doing so they receive additional nutrients/additives to aid growth, digestive function, and immunity. Provides a consistent and palatable feedstuff to ease the transition from pre-weaning to grower diets.

2015 Fall Products Guide

Wind & Rain SF AS 4 CP Mineral

Purina's Wind and Rain® All Season Minerals are available as a comprehensive line of beef cattle minerals designed to address the mineral deficiencies of the available forage, in a palatable, weather-resistant, granular formula. Wind and Rain® Storm® cattle minerals' large particle size and special formulation keeps the mineral from absorbing water and blowing out of the feeder. The Storm® technology provides the ultimate in weather resistance to reduce waste and makes Wind and Rain® Storm® Formula more economical to feed than conventional loose minerals.

Wind & Rain SF AS 4 AU2800 CP Mineral

Same as Wind & Rain SF AS 4 CP Mineral with 2800 g/ton of Aureomycin a broad Spectrum Antibiotic commonly used for respiratory infection prevention.

Pro-Phos R1600 Mineral

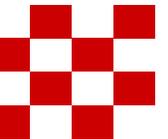

Complete Cow winter mineral containing 1600g/ton of Rumensin aiding in the prevention and control of coccidiosis in all cattle types - feedlot, stocker, beef & dairy replacement heifers, beef cows and calves - therefore reducing the challenge of the disease and improving cattle performance. From start to finish, cattle feeders rely on Rumensin to prevent and control coccidiosis and to improve feed efficiency.

All Products must be contracted by December 11, 2015 and a contract must be signed by the producer. All tubs will be billed at the discounted contracted prices.

However, **if all contracted tubs and minerals are not picked up by April 29, 2015 a 15% fee will be billed to the producers account** for any remaining tubs not picked up and the contract will be removed from the system. Contract prices listed are only available for a limited time on a limited supply of tubs. Contracts will be honored on a first come basis.

Final pick-up date is April 29, 2015.
