

**FREE-CHOICE SUPPLEMENT FOR BEEF CATTLE ON FORAGE DIETS**

**PURINA® WIND AND RAIN® ALL-SEASON 4 MINERAL TUB**

Beef cattle minerals in a cooked molasses tub that is designed to correct the mineral deficiencies of the available forage in a highly palatable, weather-resistant form. This line of minerals is designed for cow/calf and seedstock operators that need a free-choice mineral supplement to assure that their cattle are getting the proper levels and ratios of all of the 14 essential minerals cattle need for health, growth and reproduction. Wind and Rain® Mineral Tub provides these benefits in cooked molasses formulas and packaged in a non-returnable plastic tub. This gives the producer a mineral that is the ultimate in weather resistance, palatability and consistent consumption, all in its own mineral feeder.

FEATURE	BENEFIT
Balanced Mineral Nutrition	Wind and Rain® minerals contain the proper balance and ratios of all 14 essential cattle minerals. Matching the correct product for the cattleman's available forage assures cattle receive the mineral nutrition they need for health, growth and reproduction.
Consistent Consumption	Research tested and field proven, Wind and Rain® minerals are formulated with high quality, coarse textured ingredients that helps assure proper palatability. That means cattle will consume what they need, when they need it.
Weather Resistant	Wind and Rain® Mineral Tub offers the ultimate in weather resistance. Packaged primarily in the 225 pound size, it is not affected by wind or rain.
Provides Optimum Levels of Trace Minerals at a 4 to 8 Ounce Consumption Rate	Supports fertility, immune function, and overall health.
Convenience and Safety	Wind and Rain® Mineral Tub conveniently come in their own mineral feeder, a non-returnable plastic tub. Since they are non-returnable, there is no risk from the spread of disease from one farm/ranch to another.

**FEEDING DIRECTIONS**

1. Feed one tub per 25-30 head of cattle to ensure adequate intake.
2. Place tubs within 100 feet of where animals congregate (loafing, grazing, feeding and watering areas).
3. Feed tubs continuously along with plentiful sources of forage and fresh, clean water.
4. Cattle will consume approximately 1/4 to 1/2 pound of this supplement per head daily.

This tub provides a free-choice mineral delivery system that reduces producer costs associated with labor and equipment. This mineral supplement has the flexibility to provide partial to complete supplementation of minerals and vitamins, based upon animal requirements. This is achieved through proper management of tub intake which will range from 1/4 to 1/2 lb./head/day.

**CAUTION:** Do not feed this product to sheep. This product contains high levels of supplemental copper. This product was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed.
